purpose baskets

artistic, modern, attractive and exclusive
designs, our handicrafts are ready to
decorate your home to be more alive and
beautiful.

Natural bags

Rattan bag is one of the handicrafts that is becoming a trend in the fashion world.

Rattan is a natural material that is easily available in various parts of the world, because rattan trees are easy to grow and develop quickly. In addition, the maintenance of rattan is quite minimal, how to harvest rattan only requires a few harvesting tools which are quite simple and easy to place from one place to another, compared to plastic rattan, which is more environmentally friendly.

Crafts made of rattan have unlimited functions ranging from bags, shopping baskets, baby baskets, decorations or places to store clothes, providing enough benefits to make life easier for us.

Various types of woven rattan of various types, shapes and sizes give a different impression that is rarely found in other woven crafts. Rattan woven crafts have high artistic value

Using rattan Pitrit 2 mm

We are committed to continue and persistence to be innovative in improving our quality rattan products, by giving only the best woven style craft from Indonesia to the global market.

We persistence to improve the quality of our rattan product by training the young people as the next generation to bring up again the best woven style craft from Indonesia as we always know.
